## FOR THE WORKING WORLD

GTS Telecom, a member of Deutsche Telekom AG, is one of the leading IT&C service providers in Romania with state-of-the-art technologies, for customers with exceptional standards. With over 25 years of experience, we are one of the most long-standing Romanian companies and a reliable partner for telecommunications services, offering the highest quality standards in the communications and Data Center and Cloud services segment.

The national presence, interconnected with an extensive regional network and integrated with the European infrastructure of the Deutsche Telekom AG group, allows the development of a diverse range of telecommunication services adapted to the business needs of our clients.

## OUR KEY STRENGTHS

### The innovative solutions for business

We are focused on our customers' business needs and respond with innovative solutions based on the new technologies in the industry. We understand how important the stability and quality of the services we offer are for our clients' businesses, and that is why we guarantee the contractual availability of services (SLA) and we constantly update our technologies and infrastructure.

## OUR VALUES

### 1. We are dedicated to our clients

For us, it is essential to understand the needs of our clients and to build innovative solutions that help them grow their business.

### 2. We keep our word

Trust is gained. We keep our word and do what we say we will do so that everyone knows they can count on us.

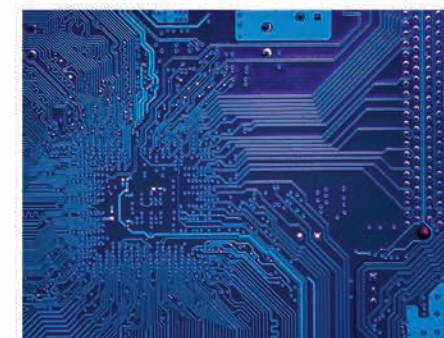

### 3. Our people make a difference

We are passionate and competent. We have the courage to try new things, we dare. We work as a team to deliver services of the highest standards.

### The network

GTS Telecom operates its own cross-border network that directly interconnects with Tier 1 operators. The company manages an extended Ethernet and MPLS network, based on a redundant fiber-optic infrastructure.

### The data-centers

100% OPERATIONAL SLA FROM LAUNCH  
GTS Telecom has its own two data centers in Bucharest and Cluj-Napoca, accommodating 400 racks. These are built according to TIA 942 standards, located on two different tectonic plates and connected to GTS's own network in Frankfurt and Vienna.

Our data centers hold ISO 27001 certification, ONJN class II license, authorization for electronic archiving operations and comply with PCI DSS standard.

### The team

The 130 professionals with extensive skills, specializations, and knowledge in the field, dedicate their daily experience and enthusiasm to provide sustainable solutions for our clients.
